

## Web site design:

### Your Web site will put you at your customers' fingertips

For many businesses, your Web site is the main line of communication between your customers and your company. Even if you do not conduct all of your business through your Web site, it may be just what the customer needs to see to choose you over a competitor.

### How it works

Your Web site will be custom-designed and fully functional so that you can begin attracting customers immediately. You can include text, photos, mouseovers, and even flash on your page.

The Fremont Tribune can custom design a website to suit any business, whether you need one page or multiple pages.

### Web page charges:

Pages are billed at a rate of \$100 per page for the first 10 pages and \$85 per page after that.

*(Please note: If you need an interface built in order to update pages on your own, the rate is higher and needs to be negotiated with your ad rep. This does not apply to the Shopping Cart.)*

**\* All prices are estimates and a specific quote will be given at time of consultation.**
